Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

TITLE OF INVENTION: Venom of Scorpions of the Genus Centruroides
TITLE OF INVENTION: Venom of Scorpions of the Genus Centruroides
FILE REPERENCE: 2099.0070001
CURRENT APPLICATION NUMBER: US 60/430,067
PRIOR FILING DATE: 2002-11-26
NUMBER OF SEQ ID NOS: 294
SEQ ID NOS: 294
SEQ ID NO 159
LENGTH: 198
                           TYPE: DNA
ORGANISM: Centruroides sculpturatus
FEATURE:
NAME/KEY: CDS
LOCATION: (1)..(198)
OTHER INFORMATION: Product= Sodium-channel modifier toxin
PUBLICATION INFORMATION:
TITLE: Cancona, M., Valdez-Cruz, N.A., Merino, E., Zurita, M. & Possani L.D.
TITLE: Genes and peptides from the scorpion Centruroides sculpturatus Ewing,
TITLE: that recognize Na+-channels
JOURNAL: Toxicon

OTHER INFORMATION: Forduct= Sodium-channel modifier toxin precursor
OTHER INFORMATION: In the mature peptide, the last Cys is amidated, and the last Gly
OTHER INFORMATION: and the last 2 basic aminoacids are cut
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            Sequence 145, Application US/10721793

Sequence 145, Application US/10721793

Sequence 145, Application US/20050065331A1

SENERAL INFORMATION:
APPLICANT: Corona Villegas, Miguel
APPLICANT: Garcia Rodriguez, Ma Consuelo
APPLICANT: Valdez Cruz, Norma Adriana
APPLICANT: Gurrola Briones, Georgina
APPLICANT: Becerril Lujan, Baleaar

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    NAME/KEY: CDS
LOCATION: (5)..(265)
OTHER INFORMATION: Product= Sodium-channel modifier toxin precursor
OTHER INFORMATION: In the mature peptide, the last Cys is amidated, and the last Gly
OTHER INFORMATION: and the last 2 basic aminoacids are cut
TITLE OF INVENTION: Recombinant Immunogens for the Generation of Antivenoms to the TITLE OF INVENTION: Venom of Scorpions of the Genus Centruroides FILE REPERENCE: 2099.0070001 US. 1070001 US. 1070001 US. 107001 US. 107001 US. 107001 US. 107001 US. 107001 US. 107001 US. 10700                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             Sequence 141, Application US/10721793

The poly-A sequence was trimmed off before ligating to vector.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         Email: jiuyu@errc.ars.usda.gov

GENERAL INFORMATION:

APPLICANT: Corona Villegas, Miguel

APPLICANT: Garcia Rodriguez, Ma Consuelo

APPLICANT: Garcia Rodriguez, Ma Consuelo

APPLICANT: Garcia Briones, Georgiana

APPLICANT: Becerril Lujan, Baltazar

APPLICANT: Becerril Lujan, Baltazar

APPLICANT: Becerril Lujan, Baltazar

APPLICANT: PRESARIN POSEAJ, Vocana de Scorpiona of the Genus Centruroides

ITILE OF INVENTION: Venom of Scorpiona of the Genus Centruroides

ITILE OF INVENTION: Venom of Scorpiona of the Genus Centruroides

ITILE OF INVENTION NUMBER: US/10/721,793

CURRENT FILING DATE: 2003-11-26

NUMBER OF SEQ ID NOS: 294

SOFTWARE: PATENTING DATE: 2002-12-02

NUMBER OF SEQ ID NOS: 294
